

## Neighbors InDeed CFL Program

**223-2763**

Neighbors InDeed would like to help you lower your PG&E electric bill.

You can save up to **\$10 per light bulb per year** on your electric bill by changing from an incandescent bulb to a CFL (Compact Florescent Light). This equates to a savings of 75% for each bulb. CFLs also have a guaranteed life of between six and nine years depending on the bulb.

CFLs now come in three brightness levels. Soft White (a yellow-toned bulb), Bright White and Day Bright. Each brightness level is available in bulb form and in flood lights for ceiling fixtures.

Call the above phone number to schedule an in-home evaluation of your lighting needs. Using a demonstration fixture, a Neighbors InDeed volunteer can show you the different bulb brightness levels and can also show you the different types of bulbs available. The volunteer will then help you evaluate where you might want to swap out your current incandescent bulbs. Cost of CFLs are about \$2 for a bulb to \$6 for a ceiling Flood light.

Once you've made a decision to purchase CFLs, Neighbors InDeed will fax your request to Home Depot where your new bulbs will be gathered and brought to the Service Counter for pick up. Once you have picked up your order of CFLs, just call Neighbors InDeed and we will install the new low energy bulbs.

Important Note: In 2007 Congress signed a law that will be phasing out Incandescent lights starting in 2012. Start now to convert your lights and save money, too.

**You'll be helping the environment at the same time!**

*Please note that some tall ceilings heights may be excluded from the program.*
